PROJECTS

SCROLLS APP - An App For An Inter College Competition.
Flutter/ UI/ UX 08/2019 - 09/2019

- A full fledged app for an Inter College Competition
- The app fetches data from backend API's (Made on LARAVEL)
- This app was exceptionally praised for its UI/UX
- Since it was made on Flutter, all the animations were rendered at 60 fps
- Users can register on the App, submit his/her synopsis and would be updated about that event from time to time
- This project was made by a team of 3 developers and was praised by our faculty staff

Notes App - A Simple Notes App
NodeJS 08/2019 - 08/2019

- Made on NodeJS
- Allowed user to Add, Remove, Edit or View Notes

Team Conatus App - A Version 2 For The Previous App
Flutter/ UI/ UX/ Firestore 06/2019 - 07/2019

- Had all the features of the previous app
- All though the code was written from scratch
- UI was improved significantly
- This app was unlocked for 60 fps animations
- Efficient usage of firestore was implemented

Team Conatus App - An App For The Society I Am A Part Of.
Flutter/ UI/UX 01/2019 - 02/2019

- This app allowed users to know more about our society, its members
- A Registration form was also included which was used on the time of the yearly main Event we organize as a society
- It had 1500+ downloads, with not a single bug reported
- Because of the online registrations, we didn't have to arrange an offline registration desk, which saved us a lot of time and man power and this was highly appreciated by our HOD

Miscellaneous - Various UI Clones And Short Playground Projects
Flutter/ UI/ UX 12/2018 - 12/2018

- Pixel perfect UI clones of famous apps like WhatsApp, Gaana etc
- Various short projects implementing different elements of UI, Functionality etc
- Usually made a small project on new functionality first before integrating it into a big project
